## International Myeloma Workshop Webcast

Paris, May 3-6, 2011

The International Myeloma Workshop (IMW) held in Paris from May 3 - 6 drew 2,700 myeloma experts from across the world for four full days of presentations highlighting the latest findings in both scientific and clinical research.

On May 5, the International Myeloma Foundation (IMF) hosted an international journalist workshop and press conference to raise myeloma awareness and share some of the important clinical research results presented at the IMW. Over 50 journalists from across the globe attended the event to learn more about the latest advances in myeloma treatments.

The panel of speakers included Dr Brian Durie (Chairman & Medical Director, IMF), Dr Ken Anderson (Program Director and Chief, Division of Hematologic Neoplasias, Dana-Farber Cancer Institute), Dr Mario Boccadoro (Head, Hematology Section of the Oncology Division of the University of Turin) and to provide the patient perspective, Mr Aldo Del Col (Co-founder & Executive Director, Myeloma Canada).
